### DETAILED ACTION

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-12,14-27,29-31,33-44,46-57 and 59-66 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Varga (EP 913951).

Varga discloses in page 3 a signal filter for removing a narrow band interference signal, including a constrained second order IIR notch filter (lines 20-25), and a controller (48-49) for receiving the output signal ( $e(n)$ ) and provide a second input signal ( $a$ ) to the notch filter to adaptively control the null frequency of the notch filter (line 29) according to a gradient-based algorithm (line 40-58), and thus minimizing the power of the output signal as claimed.

3. Claims 13,28,32,45 and 58 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
